Test Description	Value(s)	Reference Range	Unit(s)
Glycosylated Hemoglobin(HbA1C)			
HbA1c (GLYCOSYLATED HEMOGLOBIN), (HPLC)	8.7	4.6% to 6.2% HbA1c 5.7 to 6.4% HbA1c(% High risk group) Above 6.5% HbA1c (Diabetics)	
BLOOD			
Method : HPLC METHOD			
Estimated Average Glucose :	202.99	-	mg/dL

Note:

1. Since HbA1c reflects long term fluctuations in the blood glucose concentration, a diabetic patient who is recently under good control may still have a high concentration of HbA1c. Converse is true for a diabetic previously under good control but now poorly controlled .
2. Target goals of < 7.0 % may be beneficial in patients with short duration of diabetes, long life expectancy and no significant cardiovascular disease. In patients with significant complications of diabetes, limited life expectancy or extensive co-morbid conditions, targeting a goal of < 7.0 % may not be appropriate.
